

New Mōhio Report - Newborn Nomination and 6-Week Immunisations Tracking																																							
Prepared by	Ashley Hulme – Chief Operations Officer Siobhan Matich – Clinical and Quality Manager																																						
Endorsed by	Auckland PHO Senior Management Team																																						
For the attention of	GPs, Nurse Practitioners and Practice Nurses																																						
Date of launch	18 August 2025																																						
Summary of the new Report	<p>Auckland PHO have worked with Mōhio to develop a new Newborn Baby Nomination Report. This report (which includes the 6-Week Immunisation report) tracks Newborn Baby Nominations through the process to full enrolment.</p> <p>It also includes a 6-week immunisation report and monitors the three 6-week vaccinations given prior to the infant turning 3 months (i.e. no later than the day before they are 3 months).</p> <p>Using this report, we will be able to calculate the new 6-week immunisation coverage health target indicator.</p> <p>Infants will be tracked up to 14 weeks of age and will be removed from the list if:</p> <ol style="list-style-type: none"> 1. They are fully enrolled and 2. They have received their three 6-week immunisations as recorded on AIR. <p>If the infant is not fully enrolled, they can potentially remain on the list for a 12-month period (which is not ideal) or until they are fully enrolled and have a 6-week vaccination outcome.</p> <ul style="list-style-type: none"> • This report will run weekly – check out your practice report today! • Refer to the “read me” page on the report and on the following page for further information

This page provides important information about the report and how to take action using the information provided in the report.

Newborn Nominations and 6 Week Immunisations Report (Weekly Patient List)

Clinic name: XYZ Medical Limited
Date of Report: 13/08/2025

Report introduction

Newborn enrolments are a vital part of ensuring timely access to healthcare for pēpi. As soon as a parent nominates your practice as their baby's general practice, a newborn notification is sent from AIR to your system.

Upon receiving this notification, it should be accepted or declined immediately and have a B-Enrolment created within the PMS and NES.

Prompt enrolment supports on-time immunisations and Well Child checks. This report helps you monitor newborn enrolment notifications and track due dates for 6-week immunisations for pēpi nominated to your practice.

The audience for this report is: Practice Manager and administrators of Newborn Enrolments and Immunisation Nurse Leads.

Report Purpose

This report tracks:

1. Newborn Baby Nomination through the B-Enrolment process to full Enrolment
2. Administration of the three 6 week vaccinations given before the infant turns 3 months old (ie. No later than the day before they turn 3 months old).

This report will allow calculation of the new 6 week immunisation coverage indicator. Infants will be tracked up to 14 weeks of age and drop off the list if:

1. They are fully enrolled and
2. They have received their three 6 week immunisations as recorded on AIR.

If they are not fully enrolled they can potentially remain on the list for a 12month period or until they are fully enrolled and have a 6 week vaccination outcome.

Important notes

1. If a newborn notification has been accepted, the pēpi should also have been B-Enrolled at your end and in NES.
2. You do not need to wait for the baby to present at the clinic to complete a B-Enrolment.
3. Parents do not need to complete an enrolment form before attending the practice.
4. Birth certificates are not compulsory to support a full enrolment for newborns

Weekly patient list

The following screenshots show the patient list page.

Screenshot 1 of 2 – Demographic information, enrolment status, and immunisation outreach (Whaihua) status

Newborn Nominations and 6 Week Immunisations Report (Weekly Patient List)
